-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Specification***

1. The disclosure is objected to because of the following informalities: The brief description of Figure 2 is unclear. The examiner recommends inserting the word – to – after the word "manner" in Paragraph [0009], line 2.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

The term "near" in claims 3,5,7,9,11,14,16 is a relative term, which renders the claim indefinite. The term "near" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 3682

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Bell et al USP 6,609,672. Bell discloses a similar device in Fig 3, the device comprising a(n):

- torsion bar (20)
- gear (32) integral therewith, the gear is arranged at/near the end of the torsion bar (see figure 2)
- flange (14) integral with the torsion bar with a circumferential groove (Fig 2) extending more deeply than the periphery of the adjacent gear (32), between the flange and the gear
- second gear (30) integral with the torsion bar at another end thereof

5. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Gerow USP 2,315,718. Gerow discloses a similar device in Fig 3, the device comprising a(n):

- torsion bar (20)

- gear (32) integral therewith, the gear is arranged at/near the end of the torsion bar (see figure 2)
- flange (14) integral with the torsion bar with a circumferential groove (Fig 2) extending more deeply than the periphery of the adjacent gear (32), between the flange and the gear

6. Regarding claims 6,7,10,11,15,16,17 the recitation “ created by a rolling operation” is given no patentable weight. Product by process claims are not limited to the manipulations of the recited steps, only the structure implied by the steps.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Terence Boes whose telephone number is (571) 272-4898. The examiner can normally be reached on Monday - Friday 9:00 AM - 4:00 PM.
